

PROTECTIVE NANO SHIELD

It keeps the wood looking fresh

Six years after application to the already green fence

Functional coating FN® Wood effectively and long-term protects wood against degradation, aging and blackening due to UV radiation. It works as a long-term barrier with effective protection against mold, algae and fungal deposits. **Functional coating FN® Wood** converts light energy into a super strong self-cleaning effect and extends the protection of wood and its beautiful appearance.

Functional coating FN® Wood

For a fresh look of wood

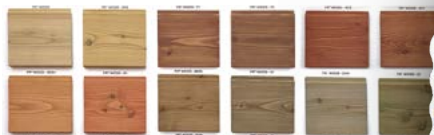

- ✓ Highly effective against mold, algae, fungi and other micro-organisms
- ✓ Maximum UV protection - protects wood against graying, blackening and degradation
- ✓ Maintains fresh wood appearance over the long term – available in a variety of wood shades
- ✓ High transparency – acts like a mat glazing, can be applied to both raw and painted wood
- ✓ High breathability and vapor permeability
- ✓ Easy application by brush or roller
- ✓ For exterior use on wooden buildings, wood cladding, fences, gazebos etc.
